Abstract: The National Register of Historic Places (NRHP) is the official Federal list of districts, sites, buildings, structures, and objects significant in American history, architecture, archeology, engineering, and culture. National Register properties have significance to the history of communities, States, or the Nation. The National Historic Preservation Act of 1966 requires the Secretary of the Interior to maintain and expand the National Register, and to establish criteria and guidelines for including properties on the National Register. National Register properties must be considered in the planning for Federal or federally assisted projects and listing in the National Register is required for eligibility for Federal rehabilitation tax incentives.

The information collection requiring OMB approval is the requirement for property owners to submit notarized letters to the SHPO objecting to the property being listed in the National Register.
